INVESTOR PRESENTATION · 2026

Naturtrade

Four generations of milling.
One gluten-free, plant-based future.

Raising HUF 800M–1bn to build our new production plant in Röszke.

Miklós Véha
Founder & CEO, Naturtrade Hungary Kft.

THE OPPORTUNITY AT A GLANCE

A heritage miller building a free-from food platform

800M–1bn

HUF investment sought

All of it goes into the greenfield plant in Röszke and its production technology

1931

Milling heritage

Four generations of millers. We make our own premium flour

250+

B2B partners

Over 100 products in 10+ categories on Hungarian shelves and in export

3–5×

Target return

Exit to a financial or strategic investor in 2030

Business plan: revenue from HUF 732M (2025) to HUF 2.5bn (2030), with EBITDA of about HUF 525M in 2030

AGENDA

What we will cover

1

Heritage & team

From the 1931 Véha mill to a 27-person food company

2

The market

Why free-from food is moving into the mainstream

3

Products & moat

From grain to cup, all made in-house

4

Traction

Shelves, partners, export and the Saudi deal

5

Competition

Positioning, SWOT and growth levers

6

The investment

The ask, capacity, plan and exit

01

Heritage & team

From the 1931 Véha mill to a 27-person food company

Where tradition meets innovation

The Véha mill, Endrőd, 1931

1931 — The Véha mill opens in Endrőd. Flour milling has been in the family ever since.

4 gen. — Four generations of millers, now applied to pseudo-cereals and legumes.

Today — Szeged plant: own milling, mixing, pasta and instant lines. 27 people.

2026–27 — Greenfield plant in Röszke, five minutes from the current site.

2030 — International free-from food platform, ready for exit.

A working food plant in Szeged

Own milling · flour blending · pasta · instant cups · R&D test kitchen · export logistics

Free-from food that anyone can enjoy

Mission

We make gluten-free products that anyone can eat with confidence, whatever their sensitivity or diet. We combine professional experience with youthful energy to keep improving them.

Vision

We want to build a company that leads international markets, where tradition, innovation, respect for nature and a family atmosphere matter equally. Our products should set trends and lead their category.

A young team with deep scientific roots

Miklós Véha

Founder-owner & CEO

Fourth-generation miller. Leads strategy, export and investor relations.

Prof. Dr. Antal Véha, PhD

Head of R&D

Vice-dean, Faculty of Engineering, University of Szeged. 200+ publications.

Orgona Tóthné

Chief Operating Officer

Runs production, quality and the plant floor.

Anita Labát

Head of Sales

Domestic retail, wholesale and key accounts.

27 people in total: production, R&D, sales, logistics and finance

02

The market

Why free-from food is moving into the mainstream

Millions need a grain-conscious diet

Share of people on a permanent special diet that affects grain consumption

10–15%
IBS / non-coeliac gluten sensitivity

10–15%
Diabetics

7–10%
Chronic kidney disease

1–2%
Gluten allergy

~1%
Coeliac disease

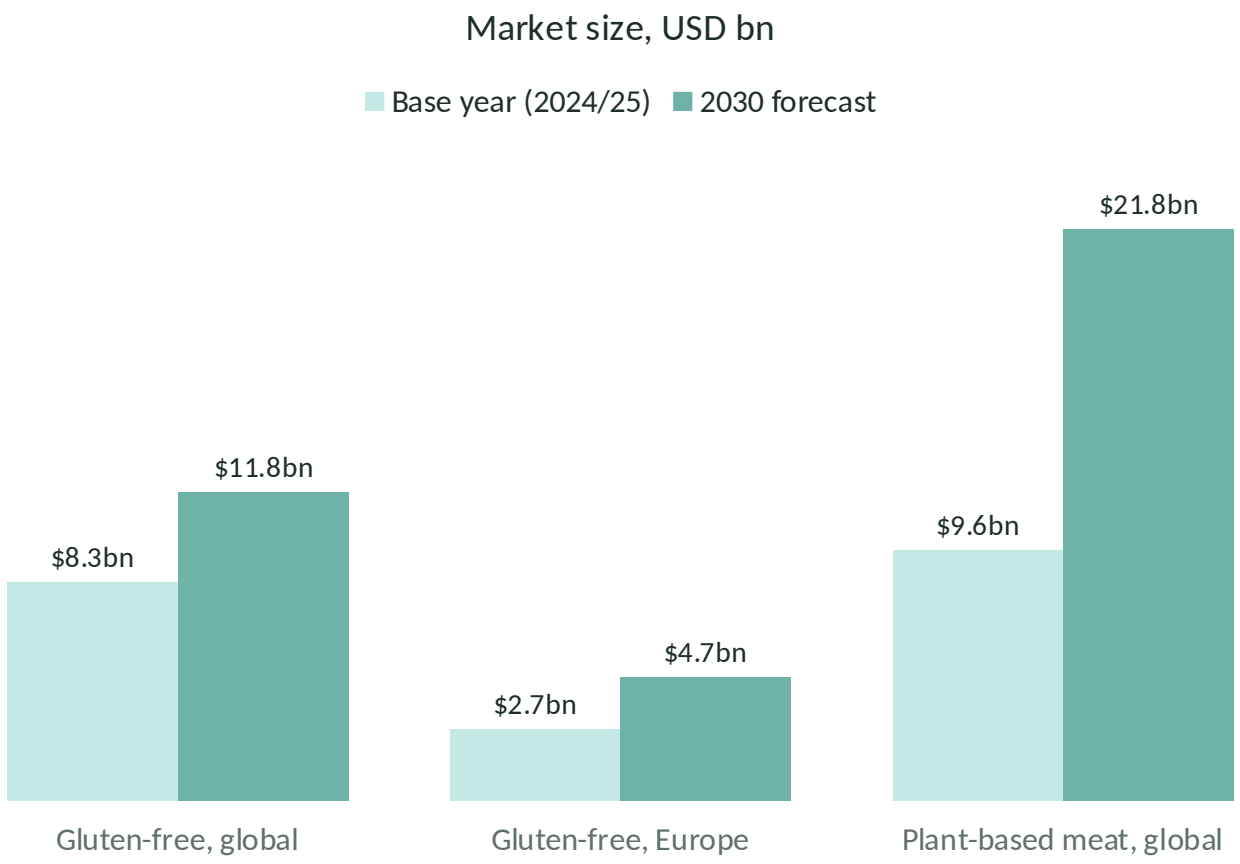

0.4%
Crohn's disease

85 kg
flour per person per year in Hungary, against an EU average of 60 kg

1.2M t
of wheat milled every year in Hungary. Gliadin, about 25% of gluten protein, drives the autoimmune response.

Every market we serve is growing

+7–10% **Gluten-free CAGR to 2030**

Global GF products grow 7.2%/yr and Europe 9.6%/yr. The UK is Europe's largest GF market.

+9.7% **Saudi gluten-free CAGR**

The KSA market was worth $127M in 2025. It is the largest GCC market, and the GCC grows about 10%/yr.

+14.7% **Plant-based meat CAGR**

Global plant-based meat grows from $9.6bn (2024) to $21.8bn (2030). This is Oosty's arena.

Sources: MarketsandMarkets (GF global, 2025–30); Ken Research (GF Europe, 2024–30); IMARC (KSA GF, 2025); TechSci (GCC GF); Arizton (plant-based meat, 2024–30).

Four shifts working in our favour

Free-from goes mainstream

Gluten-free and vegan are no longer medical niches but lifestyle choices. The Hungarian GF market alone was worth over HUF 30bn in 2023.

Healthy convenience gap

Instant food means flavour enhancers and allergens. Clean-label instant is almost empty shelf space, which is where Cupster is the first mover.

Gen Z & flexitarians

Millennials, Gen Z and Gen Alpha buy online, try new brands and want food with a story. That is our core consumer for instant food.

Import-dependent markets

The UK, Western Europe and the GCC rely on imported free-from food. A Central European producer wins on lead time, price and flexibility.

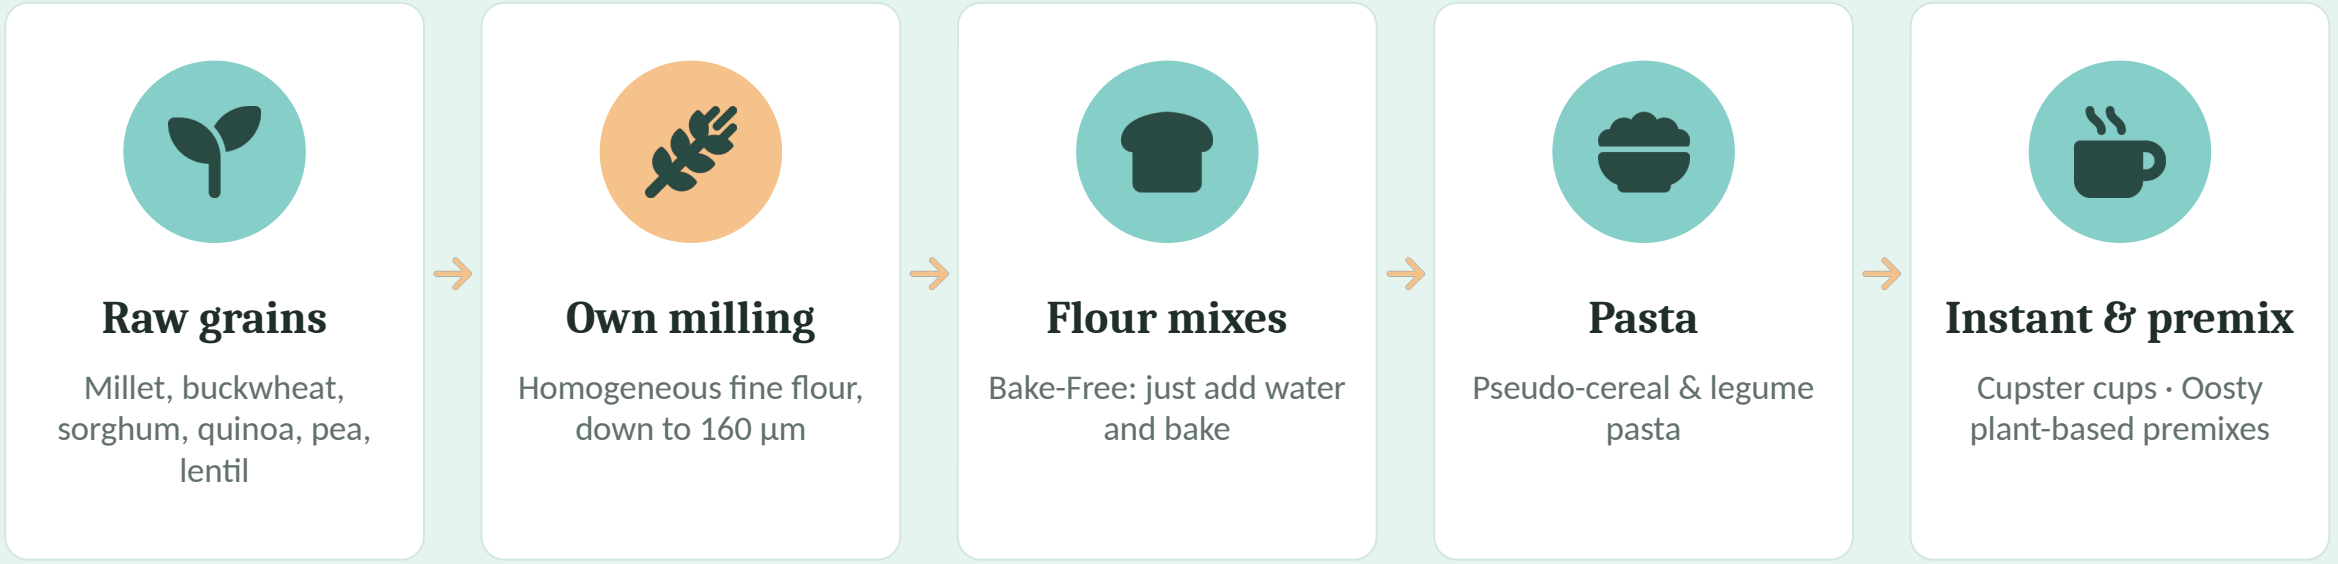

03

Products & moat

From grain to cup, all made in-house

From grain to cup, all in-house

Margin
We don't pay a miller's margin on our most important input

Speed
From idea to shelf without outside suppliers

Contract manufacturing
We produce for competitors too, so the margin stays with us

Five categories, 75+ recipes, one platform

15 — **Mono flours**
Premium fine-ground pseudo-cereals and legumes

15 — **Flour mixes**
Ready to bake: just add water

30 — **Gluten-free pastas**
Millet, buckwheat, sorghum, quinoa, lentil, pea

15 — **Instant soups & noodles**
10 soups and 5 noodle cups. A category creator

2→7 — **Plant-based premixes**
2 'cheese' mixes now, 5 'meat' mixes coming

Target: vegans, vegetarians, the health-conscious and the gluten-sensitive. For instant: Millennials, Gen Z and Gen Alpha.

Each brand has its own consumer and message

Bake-Free

Free-from, made for enjoyment

Ready-to-bake gluten-, dairy- and egg-free mixes. Strong in organic and health-food stores.

Cupster

The healthy instant

Vegan, gluten-free cups with no flavour enhancers, aimed at young urban adults.

Oosty

Plant-based cheese & meat

Powdered premixes made at home. Long shelf life and affordable. Mostly sold for export.

Mill & Folks

Our international DTC brand

Own webshop plus Amazon, for consumers in the UK and Western Europe.

Eden Premium is our domestic umbrella brand and multi-brand webshop, stocked by 250+ resellers.

Premium flour is our foundation

15

single-ingredient flours from pseudo-cereals and legumes

- **Homogeneous particle size**
  Ground as fine as 160 microns for better texture and baking
- **Our own key ingredient**
  Millet, buckwheat, sorghum, quinoa, green pea, red lentil
- **Fully traceable**
  Controlled sourcing and composition, in our own packaging

Bake-free flour mixes: just add water

15

ready-to-bake gluten-free flour mixes

- **Easy to make**
  Just add water and bake: bread, cake, pizza
- **Free from gluten, dairy and egg**
  Taste and texture that hold up against the real thing
- **Proven shelf presence**
  Stocked in organic, health-food and drugstore chains

Gluten-free pasta from ancient grains

30

pasta varieties from pseudo-cereals and legumes

- **Pseudo-cereal pasta**
  Millet, buckwheat, sorghum, quinoa, lentil, pea
- **Made in-house from our own flour**
  Not contract-made, unlike the main competitor
- **Strong in export**
  Long shelf life and easy to list with retailers

Cupster: the healthy instant category

15

instant soups (10) and noodle cups (5), and growing fast

- **Vegan, gluten-free, no flavour enhancers**
  A clean-label alternative to mainstream instant brands
- **New pack at a HUF 599 RRP**
  With a material cost of only ~20%
- **Our biggest breakout point**
  More sub-categories are in development

Oosty: plant-based cheese & meat at home

2→7

'cheese' mixes today, with 5 'meat' mixes coming soon

- **Easy to make at home**
  Powder format: just mix and cook
- **Long shelf life, affordable**
  Far cheaper than ready-made vegan analogues
- **Built for export**
  Most Oosty volume goes abroad

04

Traction

Shelves, partners, export and the Saudi deal

On shelves at home, growing abroad

100+
products

250+
B2B resellers

10+
product categories

4
sales channels

Hungary · B2B

We cover the health-food wholesalers, drugstores and organic shops. Multinational and discount chains are next.

Hungary · DTC

Eden Premium multi-shop. We list partner brands to raise basket value.

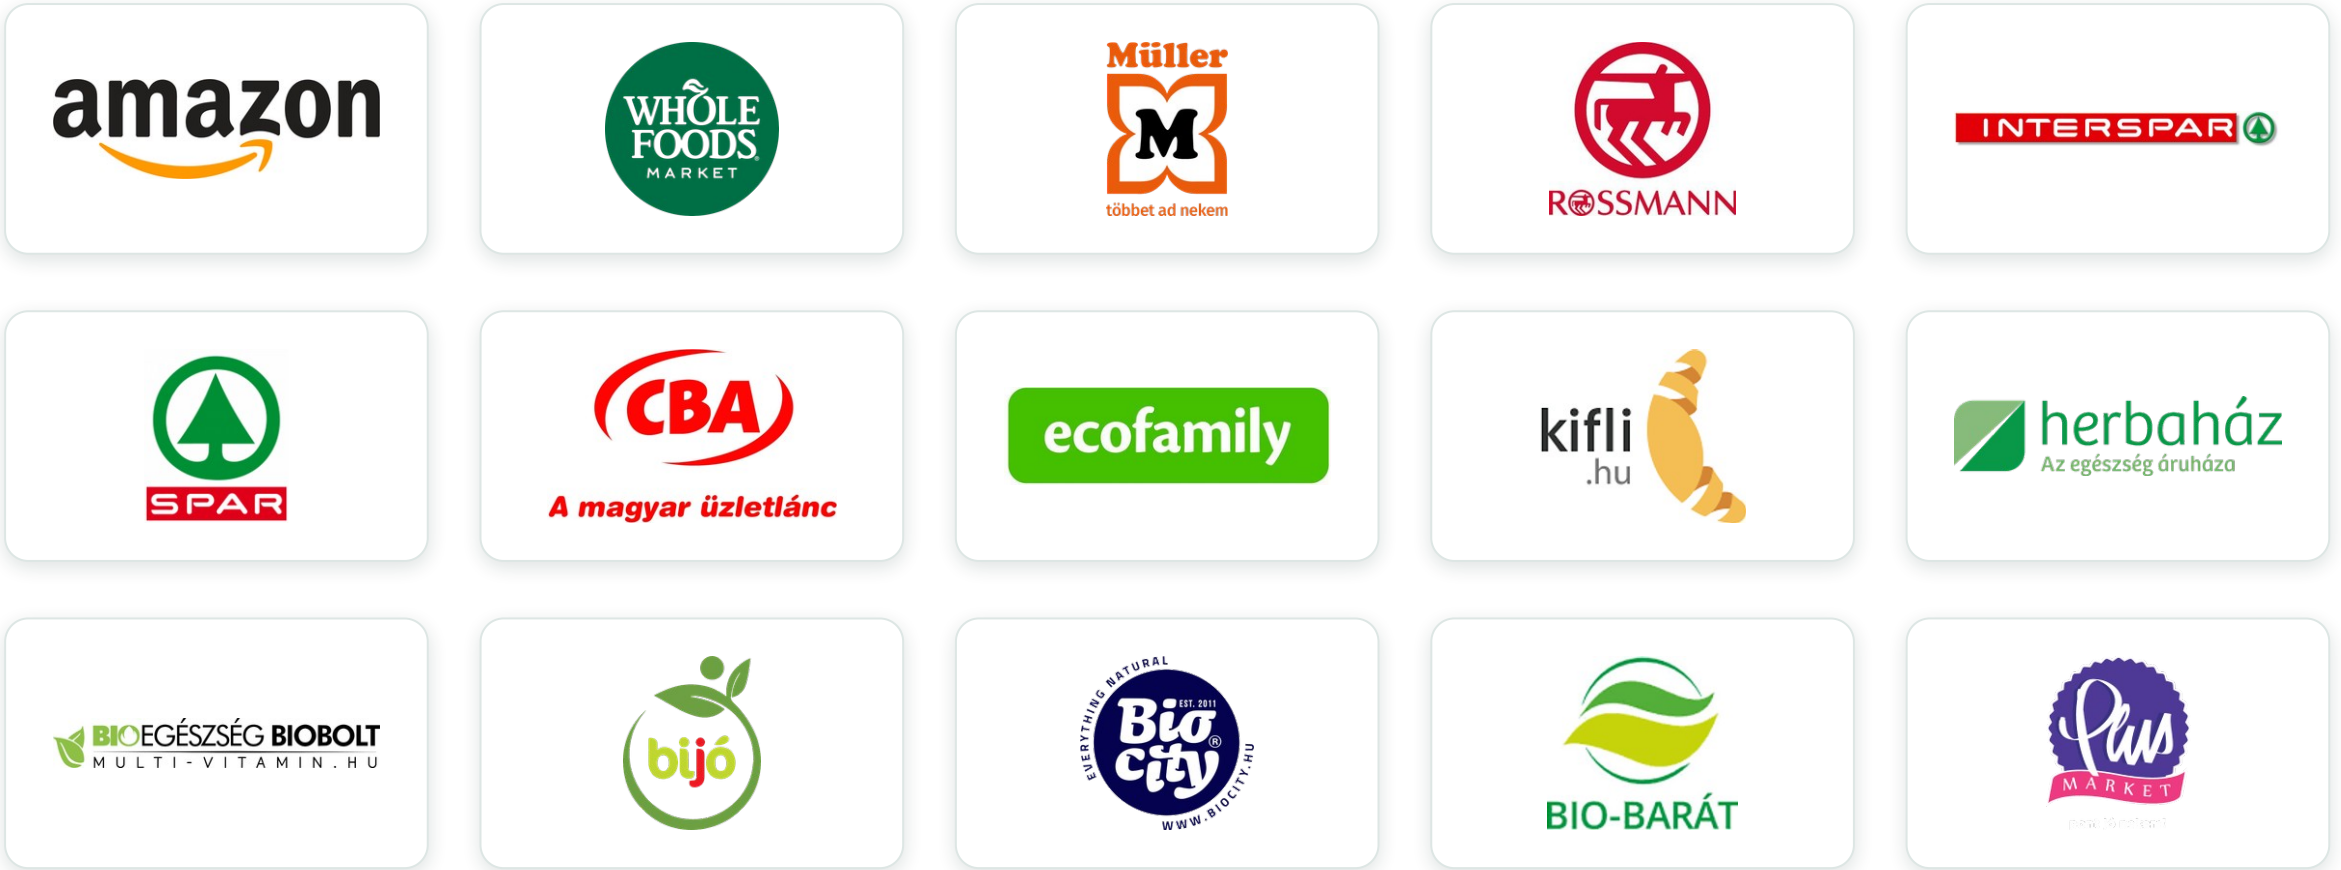

International · B2B

Distributors in the UK, Western Europe and KSA. We pivot to private label where a foreign brand doesn't fit.

International · DTC

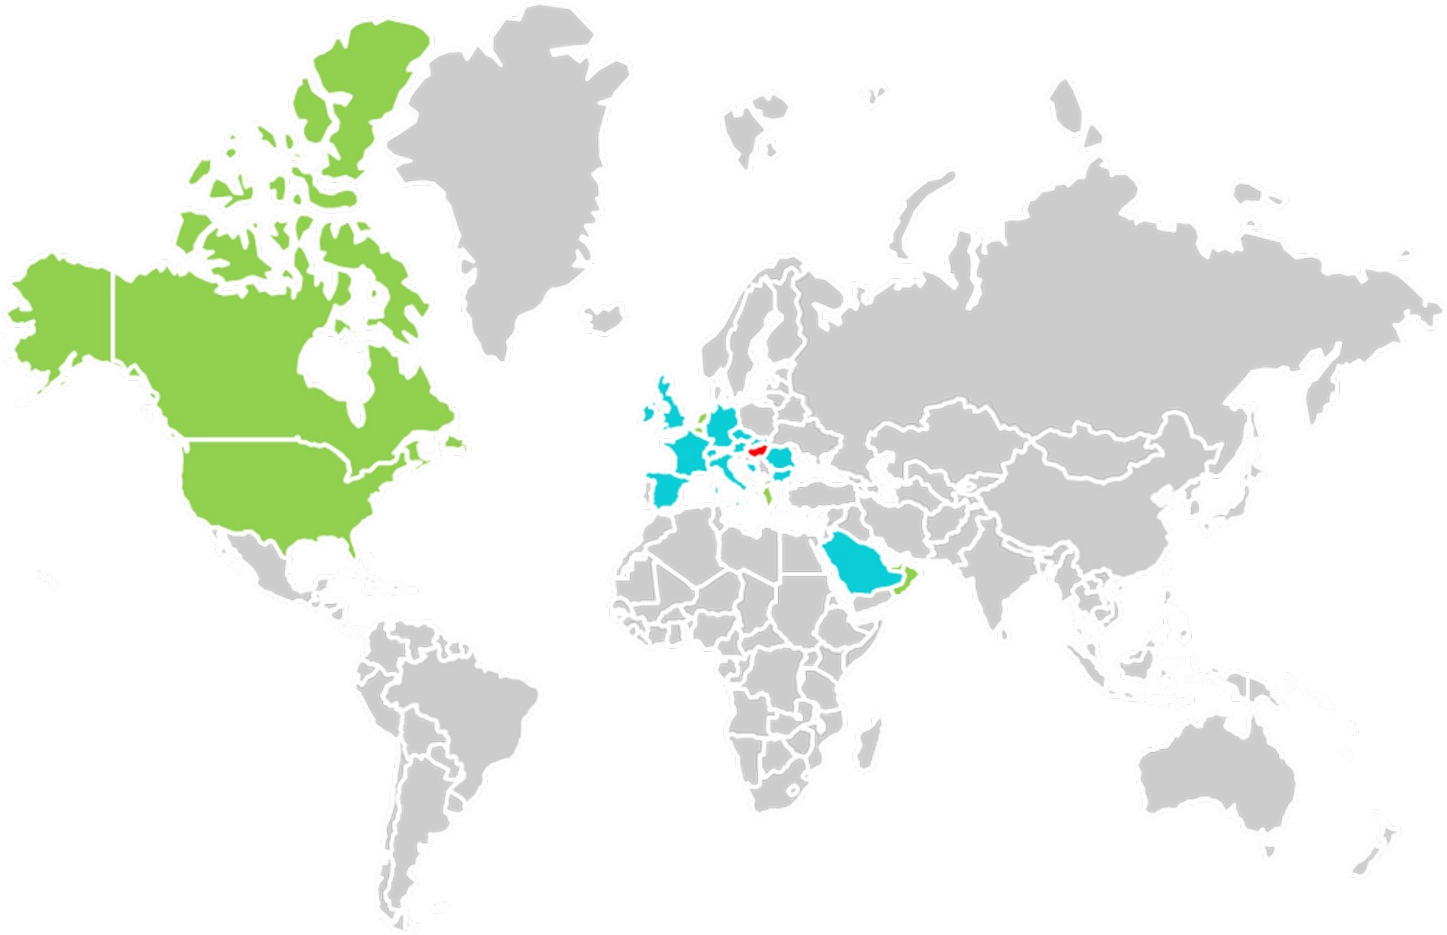

Mill & Folks webshop and Amazon. Direct-to-consumer sales have started.

Trusted by retailers at home and abroad

A selection of retail, wholesale and marketplace partners carrying Naturtrade brands.

From Hungary to the world

HOME MARKET

Hungary

Our widest coverage: organic, health-food, drugstore and retail chains.

EXPORTING TODAY

UK · Western Europe · Saudi Arabia

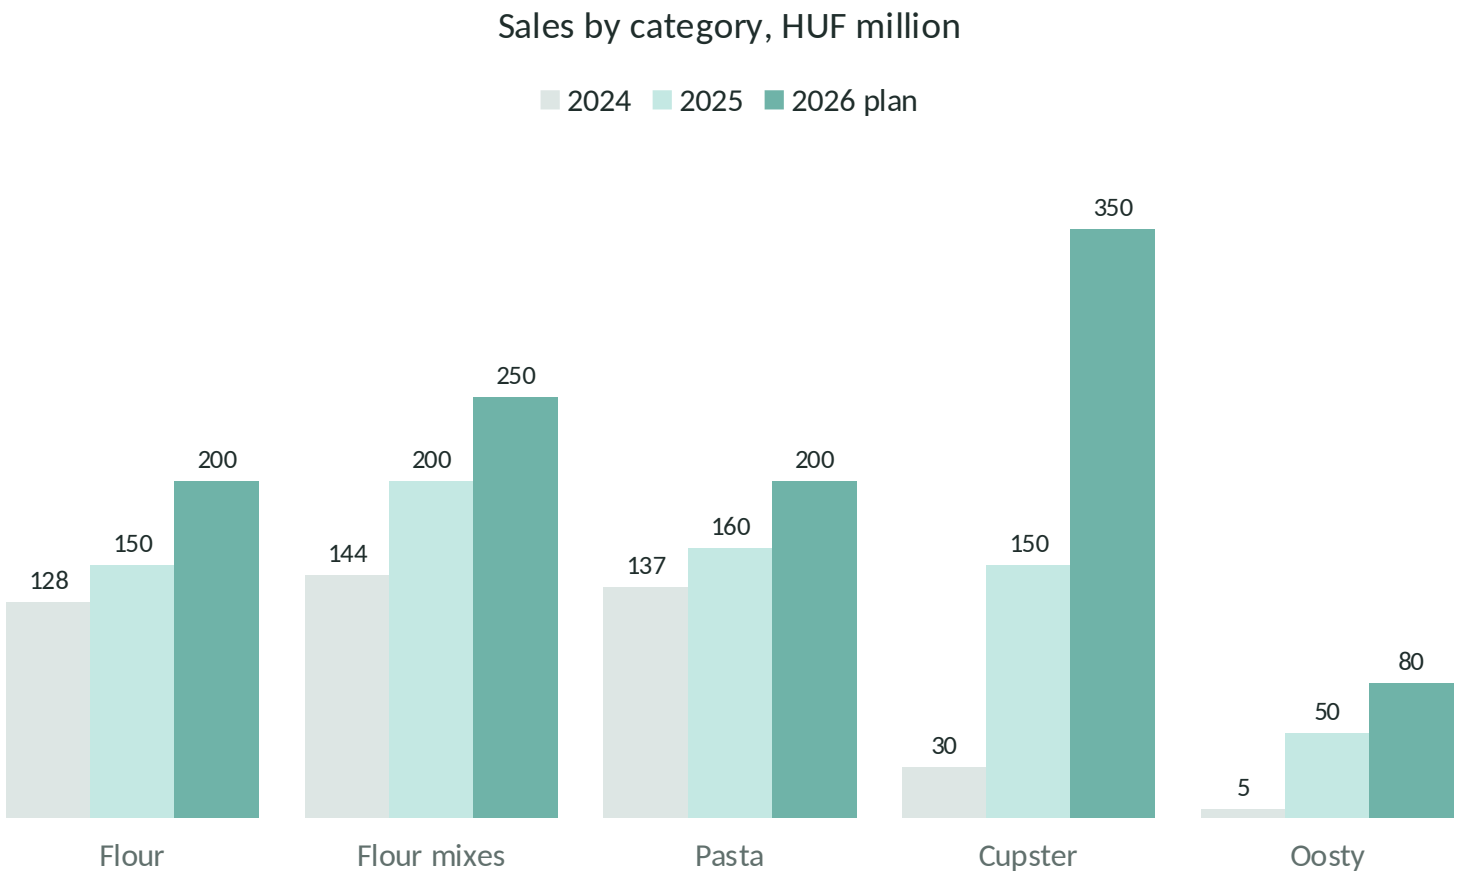

Distributors, Amazon and a first industrial-scale GF bakery in KSA.

NEXT MARKETS

USA · Canada · GCC (MENA)

Plus deeper B2B and DTC reach in Western Europe.

Cupster is our fastest-growing category

11.7×

Cupster growth from 2024 to the 2026 plan (HUF 30M → 350M)

16×

Oosty, our newest category, is export-led (HUF 5M → 80M)

The Saudi connection

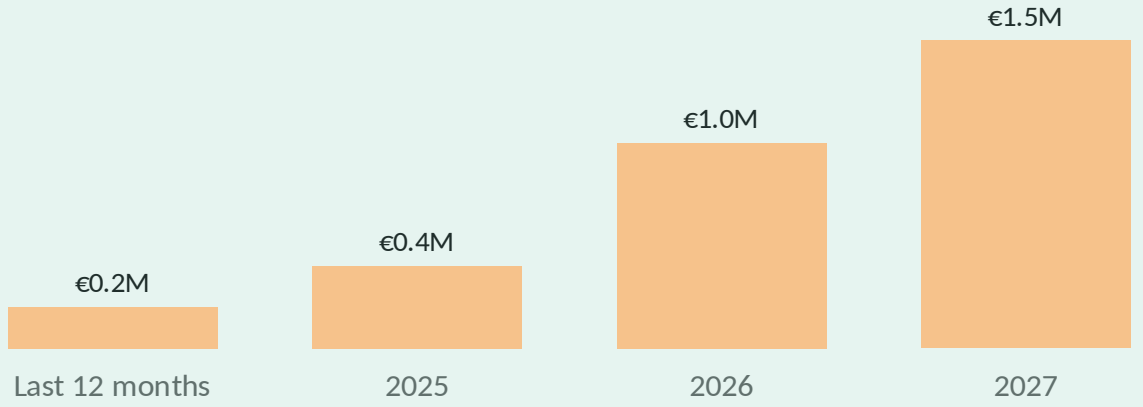

A first
The first Hungarian company to export to KSA's first industrial-scale gluten-free bakery.

State-backed demand
The Saudi state is the end buyer. Volumes are predictable and payment risk is low.

A gateway
We aim to bring the partnership to Europe within 2–3 years.

On the international stage: NOPEX London 2025

05

Competition

Positioning, SWOT and growth levers

Only one player owns the whole chain

	Naturtrade	Szafi Products	Hunorganic (It's Us)	Import brands
Own flour milling	●	○	○	○
Own production	●	◐	◐	●
Healthy instant (cups)	●	○	○	◐
Plant-based premixes	●	○	○	○
Export & GCC relationships	●	◐	○	●
Local speed and flexibility	●	●	●	○

● yes ◐ partly ○ no · Import brands: e.g. Schär, dmBio

Our edge: own milling, a constant stream of new products, strong export potential and GCC market knowledge and relationships.

Szafi Products Kft.

2024 revenue HUF 1.7bn · EBIT HUF 194M

Similar portfolio. No own milling; pasta is contract-made. Ownership changed 4 years ago and growth has slowed since.

Hunorganic Kft. (It's Us)

Revenue HUF 910M · EBIT HUF 71M

Similar portfolio. An early multinational-chain listing and pioneer brand, acquired by Foodnet (Alpro).

Exit precedent: Hunorganic was bought by a strategic buyer.

Clear strengths, known risks, a plan for both

S Strengths

- Our own premium milled flour
- Constant R&D-driven product innovation
- Contract manufacturing for competitors

W Weaknesses

- Undercapitalised, like most Hungarian SMEs
- Smaller marketing budget than Western peers
- Export growth held back by capacity

O Opportunities

- Contract manufacturing: a HUF 1.2bn opportunity
- Export: a HUF 2.1bn opportunity
- Western Europe, North America, Middle East

T Threats

- Unpredictable regulation: special taxes, price and margin caps
- Competition
- Global shocks: tariffs, Covid, the war in Ukraine

How we respond: a constant flow of new products and cost advantages (wages, energy, a faster and more flexible organisation)

Two breakout opportunities worth HUF 3.3bn

HUF 1.2bn

Contract manufacturing

We already produce for several Hungarian and international companies. The new plant lets us scale this into a stable second income stream that fills capacity.

HUF 2.1bn

Export

Western Europe, North America and the Middle East are the largest expected markets. We sell in EUR, which limits currency exposure.

06

The investment

The ask, capacity, plan and exit

HUF 800M–1bn to build our Röszke plant

HUF 800M–1bn

Investment sought. 100% goes into the new production plant.

Greenfield plant · ~HUF 700M
Relocation to Röszke, 5 minutes from today's site: concrete base, road, fence, utilities and the production hall

Production technology · HUF 100–300M
New machines and accessories, line installation and commissioning in the new hall

Röszke plant · concept visualisation

Separately, our winning ÉLIP grant co-finances further capacity expansion.

The capacity build-out multiplies output

Flour milling
A third, 1,000 kg/h mill joins the two existing mills

270 → 1,270
kg / hour

4.7×

Flour blending
A 550 L high-capacity mixer for Bake-Free

750 → 2,550
kg / hour

3.4×

Instant cups
A second automatic packer and an automatic cup filler

1 line → 2 lines + filler
automatic

2×+

The new plant is planned to triple production capacity within two years, towards ~10M units a year.

From the Szeged plant to an international exit

2025

1

Foundations

- First KSA exports
- ÉLIP grant won
- NOPEX London

2026

2

Build

- Röszke greenfield works
- New Cupster pack (HUF 599)
- Oosty 'meat' mixes

2027

3

Scale

- Plant ramp-up
- Multinational & discount chains
- KSA up to €1.5M

2028–29

4

Expand

- Western Europe B2B + DTC
- USA, Canada, GCC
- Contract manufacturing at scale

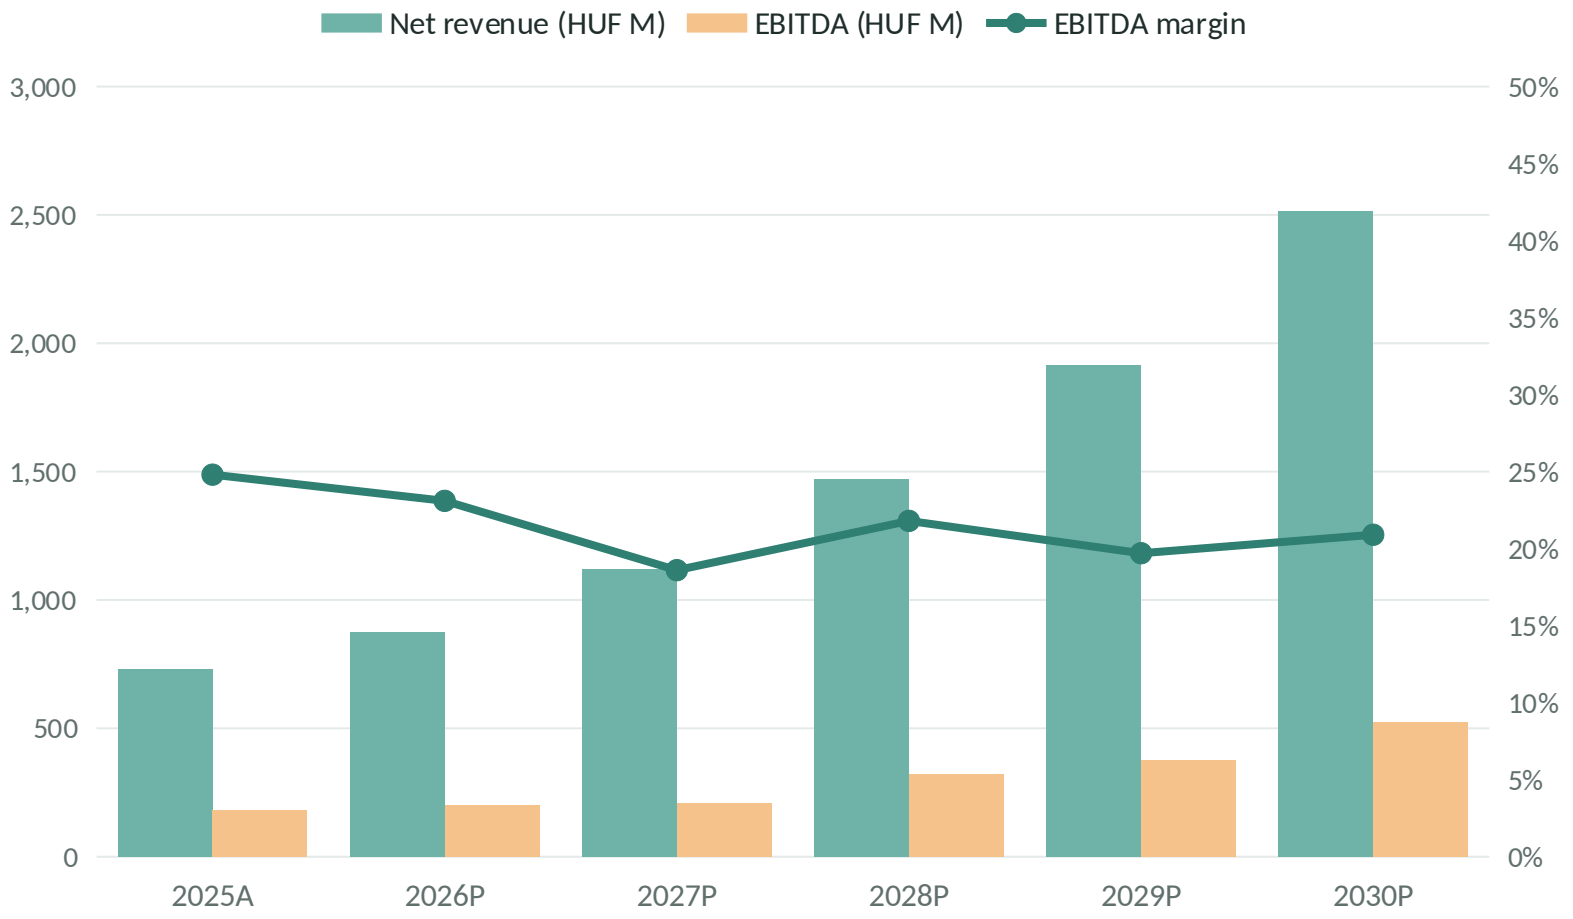

2030

5

Exit

- Sale to a financial or strategic investor
- 3–5× target

Revenue to HUF 2.5bn by 2030, at a ~20% EBITDA margin

3.4×
revenue growth, 2025 → 2030

~28%
revenue CAGR, 2025–2030

HUF 525M
planned EBITDA in 2030

Company financial plan. A = actual, P = plan. Revenue: 732 → 873 → 1,122 → 1,468 → 1,916 → 2,514. EBITDA: 182 → 201 → 208 → 320 → 377 → 525 (HUF M).

A clear path to a 2030 exit

3–5×

Target return to investors in 5 years

The value drivers are scale from the Röszke plant, export share, high-margin DTC, Cupster and Oosty growth, and contract manufacturing.

Financial investor

A sale to an international financial investor such as a PE fund or food-platform roll-up.

Strategic investor

Hungarian or international food groups, once we reach a larger company value. Precedent: Hunorganic was acquired by Foodnet (Alpro).

SUMMARY

Why invest in Naturtrade

Real moat
Our own milling plus full in-house production, a chain competitors can't copy quickly

Growing markets
Gluten-free +7–10% a year, plant-based meat +15%, GCC demand rising

Category creators
Cupster and Oosty open new shelf space, not just compete for it

Proven export
UK, Western Europe, Amazon and a state-backed KSA partnership

Capital-efficient plan
HUF 800M–1bn builds the plant, with a 3–5× target by 2030

THANK YOU

Let's grow it together.
